SOUNDCHECK

YOUR FRIENDS. THEIR MUSIC. ONE VERY COMPETITIVE QUIZ.

OUR SPRINGBOARD FROM P4A

WHERE WE STARTED

HOW MIGHT WE

HOW MIGHT WE TURN THE MUSIC FRIENDS LISTEN TO ALONE INTO SOMETHING THEY PLAY TOGETHER, SO THEY FIND OUT WHAT THEY SHARE?

PROBLEM STATEMENT

College friends each have a music identity, but listening stats get looked at alone and group music talk stays informal. They want a low-pressure way to find what they share and surprise each other.

Team: confirm the HMW and PS wording. P4a's deck implied them but never wrote them out

Problem wording from our P4a deck: "Listening stats are usually consumed alone. Group music conversations stay informal."

HOW WE IDEATED

FIVE PROMPTS TO BRAINSTORM AROUND

1. How might we make a friend's taste a puzzle the group solves?
2. How might we turn listening history into a reason to text the group?
3. How might we make Wrapped happen with friends instead of alone?
4. How might we let friends discover music through each other?
5. How might we make music taste something you compete on?

Methods from class: round robin, Crazy 8s, extreme scenarios, storyboarding. **Team: say which ones we ran, when, and who was there**

Rubric: get feedback on the top 3 before selecting. Fastest real source: 3 to 5 friends play the prototype at playsoundcheck.up.railway.app, then pick which of the three they'd open again.

SELECTION · SCORED 1 TO 5 ON THE CLASS CRITERIA

PICKING A WINNER

OPTION	FEASIBILITY	NOVELTY	IMPACT	RELEVANCE	FITS OUR HMW	TOTAL
A · Live party quiz	5	4	4	5	5	23
B · Daily drop	4	3	3	4	4	18
C · Taste map	3	2	3	3	3	14

Feasibility: A already runs as a prototype. Spotify's Development Mode caps sign-ins at 5 accounts, so A added quick picks and data uploads as other ways in.

Novelty: Wrapped is alone and Spotify Blend already makes shared playlists, which hurts C. Live trivia exists, but not built from your friends' own data.

Impact: A starts a conversation in the room. B is lighter. C is something you look at, not do.

Draft scores. Team: each member scores, then we average

OUR SELECTION

SOUNDCHECK, THE LIVE PARTY QUIZ

HOW IT ANSWERS THE HMW

It takes each friend's own listening history and turns it into questions the group answers together, out loud, in one room.

HOW IT ANSWERS THE PS

Stats stop being something you look at alone. Every round reveals something about a friend, and the cards at the end give the group a story to argue about.

What we kept from the others: B's season standings (a room that keeps working each week) and C's shareable results card.
